

## Liquid Compound

Liquid Compound mostly used on Automatic robotic polishing machines.

- Polishing compounds with right concentration of polishing abrasive to increase productivity and performance and provide uniform finish to all components.
- Good control of viscosities for easy machine adjustment.
- Pressurised tank and spray gun are used to spray the liquid compound at predefined regular time slots.

Compound code	Colour	Application	Applicable Materials
CS 2141	White	High Cutting	SS, Al, Brass, Copper, Zinc, Chrome
CS 2110	White	Low Cut	SS, Al, Brass, Copper, Zinc, Chrome, Titanium, Nickle Silver
CS 2265	Brown	Medium Cut & Gloss	SS, Al, Brass, Copper, Zinc, Wood, Plastic, Acrylic, Fibre
CS 2270	Brown	Medium Cut & Gloss	SS, Al, Brass, Copper, Zinc, Wood, Plastic, Acrylic, Fibre
CS 2210	White	High Gloss	SS, Al, Brass, Copper,
CS 2348	White	No Cut + Gloss	SS, Al, Brass, Copper, Zinc, Wood, Plastic, Acrylic, Fibre
