

Solid Compound

CS Brushtech bar compounds are manufactured with premium solid polishing paste.

The polishing compound is used on metals like SS, Brass, Copper and Aluminium. It can easily eliminate lines or scratches from the surface and provide a lustrous mirror finish. It is also applied on wood and plastic surfaces.

Application:

Automobile trim components, sheet metal, rims, jewellery, cookware, door handles, Pharmaceutical vessels, milk tanks, watches, wood products, plastics and many other applications.

Compound code	Colour	Application	Applicable Materials
CS 1325	Black	High Cutting	Copper, Brass, Al, Zinc
CS 1320	White	Medium Cutting	SS, Al, Brass, Copper, Zinc, Wood, Plastic, Acrylic, Fibre
